

Common Rail Injector CRI

Criteria:

- dismantled / incomplete
- mechanical damage
- corrosion
- carbonization
- not identifiable

Criterion: dismantled / incomplete

aggregate dismantled
→ not acceptable

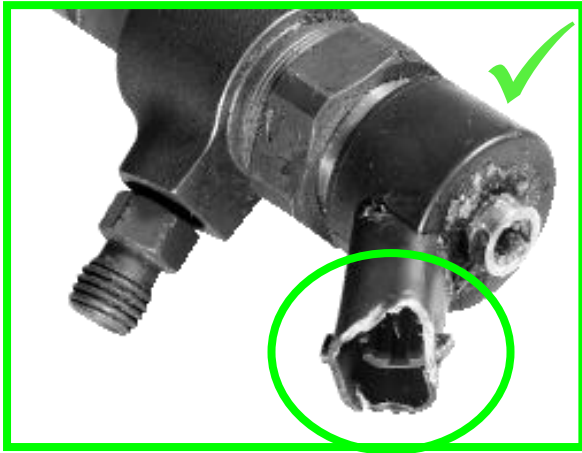

nozzle missing
→ not acceptable

inlet connector missing
→ not acceptable

Criterion: mechanical damage

damage on connector
→ acceptable

damage on body in terms of deep rabble
→ not acceptable

brushed CRI
→ not acceptable

Criterion: corrosion

corrosion → acceptable

Criterion: carbonization

carbonization → acceptable

(exception: number cannot be read from part)
